SUMMARY

Web developer with over 2 years of experience as a freelancer and as a web developer in a small company. Have a background in aerospace engineering. Passionate about learning new technologies and solving challenging problems. Dedicated to learning new skills and domains. Continuous improvement is my everyday goal. Quick learner and work well in fast-paced, dynamic work environments. Self-motivated, willing to put in the time and energy to achieve my goals.

QUALIFICATIONS

- Working knowledge of HTML/CSS, JavaScript, TypeScript, Angular 2+, React, API integration, Git, npm, Bower, Gulp
- Experience with Node.js, MongoDB, C#, Entity Framework, MySQL, Linux/Unix
- Understanding of object-oriented programming, data structures, and algorithms
- A STEM graduate with problem-solving skills and analytical thinking

PROJECTS

Collaborative editor, March 2018 - Current

- HTML, CSS, BOOTSTRAP, TYPESCRIPT, ANGULAR 2+, NODE.JS, FIREBASE

A collaborative application with text editor and live chat was created in a small team. I contribute mostly as a front-end developer, I create the main skeleton of the application using HTML, CSS and Angular 2+ (TypeScript).

Interview management system, January 2018 - February 2018 | [Source Code](#) | [Demo](#)

- HTML, CSS, SASS, BOOTSTRAP, TYPESCRIPT, ANGULAR 2, NODE.JS, MONGODB, NG2-CHARTS(CHARTS.JS)

An interview management system was fully created by myself. It stores data of interviews and candidates in a MongoDB. Users can look up interviews data, search and filter interviews, see candidate's profiles, see reports and customize them by different categories. Hosted on Firebase.

Bug Tracker, January 2018 | [Source Code](#)

- HTML, CSS, BOOTSTRAP, C#, ENTITY FRAMEWORK

A bug tracking system, fully created by myself, which allows users create projects and issues for the specific project. Manage projects and issues, assign to people, comment on issues. All data is stored in MSSQL using Entity Framework.

Task Manager - Tasker, November 2017 | [Source Code](#) | [Demo](#)

- HTML, CSS, BOOTSTRAP, JAVASCRIPT, REACT

A task manager application (light version of Trello), fully created by myself, allows users to add, edit and delete tasks. All tasks will be stored in the user's local storage

Calculator on React.js, November 2017 | [Source Code](#) | [Demo](#)

- HTML, CSS, BOOTSTRAP, JAVASCRIPT, REACT

A simple calculator that supports addition / subtraction / multiplication / division / power. Developed without using JavaScript eval() function. The calculator handles division by zero. Designed under inspiration of Fluent Design System by Microsoft.

WORK EXPERIENCE

Web Developer, Wayup.in, May 2017 - Present

Develop webpages for educational project Wayup.in in Ukraine.

Technologies: HTML, CSS (SASS), Bootstrap and JavaScript (jQuery), Gulp, Bower

- Create adaptive and cross-browser landing pages with responsive design
- Use gulp build system with npm and bower package managers for developing web projects
- Integrate webpages with MODX CMS

Website Manager, STEP Computer Academy, Bellevue, WA, June 2016 – April 2017

Technologies: HTML, CSS/SCSS, Bootstrap and JavaScript/jQuery, Photoshop, Illustrator

- Created adaptive and cross-browser promotional landing pages with responsive design
- Filled the website with content through WordPress. Created new pictures for advertising in Adobe Photoshop and Illustrator.
- I helped to rump-up new colleagues and mentored them during their first weeks in the company
- Created Advertising materials using Adobe Photoshop and Illustrator for online and offline ad campaigns
- Took pictures of students at events. Edited photos and videos for social media

Freelancer - Web Developer, January 2016 - June 2016

Developed landing pages and websites for different customers. Technologies: HTML, CSS/SCSS, Bootstrap and JavaScript/jQuery, Gulp, Bower

- Designed and developed websites and webpages for different clients
- Created custom CSS animations
- Deployed websites to production
