Computer Science student pursuing a Computer Science Bachelor's Degree with a background in aerospace engineering. Responsible, passionate about learning new technologies and solving challenging problems. Self-motivated, willing to put in the time and energy to achieve goals. Please, find projects on the portfolio website.

## Qualifications

---

- Object-oriented software development. Web development. Data structures. Problem-solving
- Preferred Languages: Java, TypeScript, JavaScript. Familiarity with C++, Assembly, Python, Prolog
- Web Technologies: HTML/CSS, Bootstrap, jQuery, React.js, Angular 2+, Node.js, Google Firebase, MongoDB, npm
- Tools: JUnit, Eclipse, Adobe Photoshop, Adobe Illustrator, Adobe XD

## Work Experience

---

### Software Engineer Intern in Microsoft, June 2020 - Aug 2020

Led development of a prototype web application to increase digital literacy across adults with no prior experience working with digital platforms. In a team of 5, developed a vision, identified user needs, developed project scope, and implemented a working prototype within aggressive timelines. Developed the most challenging interactive parts of the prototype as well as provided technical guidance to the team. Pitched a working application to the executive leadership and got positive feedback.

- Went from a problem statement to a working web app using HTML, CSS, Typescript, React, Git
- Led process of Identifying user needs, developing projects scope, designing and implementing core features of the prototype
- Was playing the role of a team leader in a team of 5
- Provided a lot of design and development solutions that were successfully implemented in the final product
- Was actively mentoring other interns with their technical challenges

### Web Developer (Remote) in Wayup.in, May 2017 - Aug 2018

Played a key Developer role in building promotional campaign web pages for an educational project Wayup.in in Ukraine. Followed high standards and best practices of developing responsive designs that would work on any device. Created promotional campaigns for over 30 different courses with unique designs and requirements.

- Created adaptive and cross-browser landing pages with responsive design using HTML, CSS, Bootstrap, and JavaScript(jQuery)
- Used Gulp build system with npm and bower package managers for developing web projects
- Integrated webpages with MODX CMS

## Office Manager in STEP Computer Academy, Bellevue, WA, Jun 2016 – April 2017

- Helped to rump-up new colleagues and mentored them during their first weeks in the company
- Added new content to their website through WordPress
- Created Advertising materials using Adobe Photoshop and Illustrator for online and offline advertising campaigns
- Took pictures of students at events. Edited photos and videos for social media

## Education

---

Bellevue College, Bellevue, WA, current GPA - 4.0

Bachelor of Science - Computer Science, Mar 2019 - Dec 2021

STEP Computer Academy, Bellevue, WA

Web development course, June 2017 - Jan 2018

National Aerospace University, Kharkiv, Ukraine

Bachelor Degree in Aerospace Engineering, Sep 2010 - July 2014
